Description

This is the most stunning 19th Century Carved Wooden Gothic Church Frame with a religious tapestry. You can't quite see from the pictures but the carvings are raised and from a distance look like metal. It is gorgeous and in very good condition with only a tiny piece missing from the top left. It is large and measures 25.5" high by 3" deep and 23" wide. The buyer will be absolutely delighted with this picture. Please view my OTHER interesting items. Many thanks.
