Description

An impressive and important vintage emerald ring. The centre stone - weighing a confirmed 10.42 carats and certified as being Colombian with moderate clarity enhancement - is a glowing and bright green. The stone is secured by four double claws within a beautifully detailed gallery, leading to tri-split shoulders to a D-shaped shank. It is incredibly rare to find an emerald of these dimensions and with this quality. Accompanied by an emerald report from The Gem & Pearl Laboratory stating the emerald shows evidence of moderate clarity enhancement, and is Colombian in origin. Cut: Cushion. Clarity: There are some visible inclusions (which is normal and expected in emeralds - especially ones of this size - but these do not detract from the vibrancy of the stone). Carat: 10.42. Circa: 1950. Size: O (UK) or 7 (US). Free sizing available. Measurements: The emerald is 15.1 x 12.4mm and sits 8.4mm from the finger. Weight: 7.00 grams. Metal: 18k gold. Tested with a Niton DXL Precious Metal Analyzer.
