Description

This elegant ring showcases a sparkling old-cut diamond, set within star-shaped settings, for 0.02ct. The intricate swirling detailing on the shoulders adds a touch of timeless sophistication, gracefully leading into a plain, yellow gold band. This ring is fully hallmarked by the Assay Office of Birmingham for 18ct gold in 1864/1865. The back of the band shows signs of a previous resize as photographed, but this is not particularly visible when worn. There is also a chip to the diamond's facet edge, but this is not noticeable with the naked eye.
