Description

William and Mary chest of drawers in oyster cut laburnum, with holly edging and cross grain mouldings. The top with line scrolling. Also the drawers are all oak lined, a sign of quality, as is the fact that the ends are oyster cut veneers. These chests were made between 1680 and 1710 and are rare survivals. This one has had the feet replaced a long time ago and later handles which are in period with the chest. The second drawer down has a working lock. This is a glorious piece and would look great in any home

Internal Ref: oyster
