Description

A rare and authentic Italian Ex-Voto from the late 19th early 20th century, depicting the Flaming Sacred Heart within an oval gilt frame behind glass. Made of silver, this lovely small devotional object, is a genuine piece of tradition of the Catholic Church. Ex-Voto derives from the Latin phrase meaning "from a vow," and refers to a gift, donation, or offering presented by worshippers for votive purposes. It serves as an expression of gratitude toward God, the Madonna, Jesus, or a specific saint (often the one of the parish of reference) in recognition of a grace or favour received. The beautifully aged and moulded oval frame is made of brass.
