Description

A beautiful high quality Indian antique solid lidded box / pot. It is unmarked but tests as high grade silver. I would date it to c1920. It has been superbly made and is in superb condition being free from dings splits holes and repairs, a tiny mark to the base see final photo and the lids rides up a little. It measures approx. 3.75 inches (9cm) across by 2.25 inches tall and weighs 174 grams. A very well made piece.
