Description

Pair of 19thC Church Organ Architectural Panels, Hand Made Simulated Pipes 187cm A pair of original 19th century church architectural panels, hand made simulation of church organ pipes. The pair of substantial panels are expertly hand made and each measures 186cm tall and 90cm wide, combined to measure 180cm wide. Built to hang above the church organ, to simulate zinc or metal organ pipes, made from solid wood and hand painted to create the illusion of authentic pipes, the original pipes perhaps concealed behind and less ornate and grand. The panels are superbly constructed, heavy and robust, excellent decorative panels for a home interiors project, set or commercial space, presented in mostly excellent and original condition with a charming timeworn patination. Dimensions Height 186cm Width 90cm Combined width 180cm Please request more photos and any questions invited. Collection from East Sussex. We can arrange the whole of U.K. weekly delivery for £120, please enquire for Scotland.
