Date of manufacture: 1910

Dimensions

Height = 70 cm (27.6")

Width = 24 cm (9.4")

Depth = 12 cm (4.7")

Description

A very attractive wall hung "weather station" by the World renowned maker HAC. Made from beautifully polished light mahogany, it presents a combined clock, thermometer, and barometer all in good working order. The 5" (13cm) 8 day timepiece clock has a white enameled dial with black Roman numerals. This is matched by the same sized barometer to the base, with a 6" (15cm) silvered, mercury thermometer to the centre. The (banjo?) shaped case has a "break-arch" pediment to the top, reeded pillars, and complimented by very attractive finials to both the top and underside. A lovely little unit that would look very smart in any home.
