Item Reference: SA1178526

Date of manufacture: 1890

Dimensions

Height = 7 cm (2.8")

Width = 16 cm (6.3")

Depth = 12 cm (4.7")

Description

A good example of a Microspectroscope dating from the late 1800s. Engraved with the maker's name to the tube and serial number '39'. The body is also engraved with a monogram 'S & A.D.' next to a crown above 'MET.LAB. 82". This is also stamped on the top of the box. It comes in its original fitted mahogany box with good quality dovetail joints and a brass closing latch. The instrument is in excellent original condition and the lacquered brass body is in good order with a few minor marks but nothing detrimental. I have not tested the item and it is sold as seen. Approximate Measurements (box) : Height : 2 3/4" (7cm) Length : 6 1/4" (16cm) Depth : 4 3/4" (12cm) The best description comes from the photos so please look at them all carefully and if you have any questions just ask. Tracked UK Delivery £10
