Dimensions

Height = 17.2 cm (6.8")

Description

Technical Description A rare example of an 18th century opaque twist wine glass dating to c1760. It has a bell bowl above a triple series opaque twist stem consisting of a pair of 6-ply spiral bands (element 1), outside a pair of spiral gauzes (element 2), the gauzes containing solid spiral cores (element 3). Conical foot. **Comments** A triple twist is defined as having three independent elements, each element being different. For instance a stem containing 3 spiral gauzes is defined a single series as all element are the same and perform the same action within the stem. A pair of spiral gauzes outside a solid core is a defined as double series. So it is NOT the number of elements that count but what the elements do, that dictates their classification. A triple series occurs in approx. 1-300 ratio within the opaque twist stem classification. **Date & Origin** England, c1760. Period of George III. **Condition** Excellent, age-related wear as shown. No chips, cracks or restoration. **Dimensions** Height: 17.2 cm Rim diameter: 6.7 cm Foot diameter: 7.6 cm

Internal Ref: 2025090212
