Date of manufacture: 17th Century

Dimensions

Height = 36.8 cm (14.5")

Width = 14.6 cm (5.7")

Depth = 14.6 cm (5.7")

Description

The finest and most original example that I have ever seen. The 30 hour duration movement with Verge escapement and a short internal pendulum that swings between the wheel trains. The pendulum bob is of a well-shaped, 3 dimensional brass 'anchor' that swings through the side doors and can be seen within the 'wings'. The un-colleted wheels are mounted on tapered iron arbors that are pivoted between 2 pairs of upright narrow plates, 3 of which are of cruciform shape. The striking release arbor that runs from front to back has a large central 'stirrup' to give clearance for the pendulum. The movement has countwheel striking the hours on the top-mounted cast bell that is hung from a decorative cross strap that has a central urn finial and sprung within the further 4, matching urn corner finials. The wheel trains are rope driven by the Huygens 'endless cord' method. The tapered Doric style corner pillars have shaped ball feet. The 3 cast brass top frets are well executed and the front one is nicely engraved. The 6 1/4" diameter chapter ring has an outer ring, Roman hour numerals, a double ringed and divided quarter track to the inner and there and 'wheat stalk' half hour mar...

Internal Ref: SA 17532
