Item Reference: SA1193467

Date of manufacture: 1940

Description

Gents Omega 30T2 wrist watch, 1947. The watch has a 15-jewel 30T2 PC (which relates to the shockproofing) hand-winding movement which is working nicely. The movement is fully signed and it has the serial number 11,450,927 which dates it back to 1947. The watch measures 33mm diameter excluding the later winding crown and the lugs. The case is stainless steel and was made for Omega by Dennisons, the English watch case maker... it is thought that Omega commissioned Dennisons so as to avoid Customs duty on complete watches. The case is in very nice condition, just one minor mark to the bottom right lug but not too detrimental at all. The lens is in lovely condition. The signed dial is in its original finish with original feuille hands. Light age related marking to the dial but nothing serious at all. A new leather strap has been fitted. The watch comes in a new presentation box.
