## Description

Antique Langendorf pocket watch. The watch has a good quality 15-jewel stem-winding movement, identified as by Langendorf, which is working nicely. The movement is protected by an inner cover which has some gentle unevenness. The watch measures 50mm diameter excluding the winding stem and the loop. The case is gold plated and was made by the Star Watch Case Company. The front and sides of the case are in lovely condition, again some gentle unevenness to the back. The acrylic lens has light marking. The dial looks good to the naked eye... if viewed through a jeweller's loupe, there is a short faint hairline on number 11. Original blued steel hands, a subsidiary seconds dial and outer minute track. The watch comes in a new presentation box.
