Depth = 5 cm (2.0")

Description

Hi I have for sale a 1900s French solid silver and enamel miniature carriage clock made in France, which was fully restored, both movement/platform and case, in March 2026. The Case The case is in solid hallmarked silver and stands 9.5cm high, 5cm wide, with a depth of 5cm it is in very good condition with mint convex glass front. The Dial The dial is in good original condition in white porcelain with ornate black hands. The Movement The movement is an eight-day timepiece only; the movement has been cleaned, serviced and oiled so keeping great time over the eight days via the original cleaned/serviced silver platform escapement to the top. Original key included. Overall, a very beautiful top-quality carriage clock by a quality French maker that looks stunning on display and contains all of its original features. This is quite a rare find these days. I had trouble with the photos because of its size and deep shine, it is much better in the flesh. I will post worldwide.

Internal Ref: Silver Miniature
