Width = 7 cm (2.8")

Depth = 3 cm (1.2")

Description

Hi I have for sale a 1900s French solid silver miniature carriage clock made in France, which was fully restored both movement/platform and case, the case is a watch holder with the watch.. The Case The case is in solid hallmarked silver and stands 10cm high x 7cm wide with a depth of 3cm it is in very good condition with mint convex glass front. The Dial The dial is in good original condition in white porcelain. The Movement The movement is a thirty-hour time-only; the movement has been cleaned, serviced and oiled so keeping good time over 30 hours via the original cleaned/serviced platform. Overall, a very beautiful small enamel clock by a quality French maker that looks stunning on display and contains all of its original features. This is quite a rare find these days. I had trouble with the photos because of their size and deep shine; it is much better in the flesh. I will post worldwide.

Internal Ref: Watch holder
