| USD \$236 | EUR 205

Item Reference: SA1203048

Date of manufacture: 1900

Description

Antique Waltham pocket watch, 1908. The watch has a 15-jewel stem-winding movement, Sterling grade, which is working nicely. The movement is fully signed and it has the serial number 16,697,495 which dates it back to 1908. The watch measures 54mm diameter excluding the winding stem and the loop. The case is Silverode, an alloy often used in watch cases around this time and it came under various names such as Silveroid and Silverine. The front and sides of the case are in good condition, the screw-on case back has some unevenness and a few short scratches. The thick glass lens has a few small marks but is very acceptable. The signed dial is in lovely condition with blued steel hands. The watch comes in a new presentation box.
