Description

Antique Doxa pocket watch. The watch has a 15-jewel stem-winding movement which is working nicely. The movement is signed with the Doxa name and it is all protected by an inner cover which has details of Doxa's gold medal won in Milan in 1906, and their participation in the Liege exhibition of 1905. This inner cover has some scratches where it has been opened in the past. The watch measures 53mm diameter excluding the winding stem and the loop. The case is nickel and it is in good condition, just light surface marking, nothing serious at all. The glass lens is in lovely condition. The signed dial has three faint hairlines but they are difficult to see with the naked eye. The watch comes in a new presentation box.
