Description

Republic Period Jadeite "Double Dragon" Pendant Circa 1925 –1936 Dimensions: 5cm x 5cm. A single-sided, openwork carving featuring two dragons facing a central pearl. The reverse side is smooth and flat. Material: Natural "Oily Green" Jadeite. Dense and cold to the touch. Bilateral Drilling: Close-ups of the suspension hole show it was hand-drilled from both sides (meeting in the middle), a hallmark of traditional manual tools. Hand-Polished: Features a soft, waxy luster rather than the "glassy" finish of modern machine-made pieces. Market Context: This "flat-back" style was highly popular for export jewellery during the early 20th century. Provenance UK Private Collection, Brought Hong Kong 1967
