Description

Late C19th Chinese Qing Dynasty carved hardwood rectangular centre table with inset rouge marble panel top. Impressive carved 'huali' hardwood centre table , with traditional carved motifs and carved and pierced open-work fret friezes of 'endless-knot' design. The top with a highly figured inset rouge marble 'floating' panel. Raised on shaped carved supports with carved claw feet. In excellent original condition, the dense hardwood has achieved a rich colour, patina and lustre to the original surface . The marble top with some minor historic scratches and fissures. The underside of the frame benefits from some extra strengthening blocks which have been added historically to provide stability, but cannot be seen viewed when the table is standing. A highly decorative table of freestanding form and good scale and proportions to add an exotic oriental accent to an interior scheme. H 32" W 45" D 24" China c.1880
