C&T Patent Altitude Adjustment Aneroid Barometer by Short & Mason, London

Price

GBP 495

| USD \$670 | EUR 579

Item Reference: SA1207631

Date of manufacture: 1910

Dimensions

Height = 15 cm (5.9")

Width = 13 cm (5.1")

Depth = 6 cm (2.4")

Description

For sale, an early Twentieth Century brass cased aneroid with C&T patent altitude adjustment by Short & Mason Limited, London. Comprised of a five-inch white ceramic and painted dial with scale divided for 26 – 31 degrees of barometric pressure around the entire circumference. Around the inner arc it is painted with weather indications in a beautiful Gothic font. It is further painted with the word, "aneroid barometer" to the base and with the maker's name, "Short & Mason Ltd, London" above. This rare form of aneroid barometer has three pointers incorporated into its design with a blue steel pointer indicating current pressure at chosen elevation and a brass pointer which allows the recording of the pressure at a given reading point. The final pointer is constructed in copper and denotes this instrument as having been manufactured for the C&T patent altitude adjustment. The company describes this invention in its 1911 catalogue as follows: The C&T patent altitude adjustment consists of an auxiliary hand of copper. This is adjustably attached to the pressure hand and moves with it, While the pressure hand shows the actual atmospheric pressure at the altitude at which ...
