Date of manufacture: 1960

Dimensions

Height = 20 cm (7.9")

Width = 3.5 cm (1.4")

Depth = 1 cm (0.4")

Description

This is a fabulous example of a vintage mens watch made by the premium Swiss make Omega. This is the heavy solid 9ct gold Omega Seamaster with the rare art deco full numeric dial from 1966 with the twenty four jewel calibre 562 movement one of Omegas most reliable automatics. The dial is in mint condition having just been professionally restored, it is finished with solid gold faceted numeric hour markers. A very rare dial which really does make this watch stand out. The Omega symbol is on the crown and it is fully marked Omega on the dial, movement and case as you would expect. The heavy 9ct gold case has been ultrasonically cleaned and lightly hand polished so it is absolutely pristine with sharp edges. The case was made for Omega by the British company Dennisons who made most of the solid 9ct gold cases used by Omega. Dennison cases tend to be around 25% heavier than the standard Omega watch cases. The watch case measures 34.5mm in diameter not including the crown. Omega are one of the most exclusive watchmakers in the world and this watch certainly has that understated elegance that whispers class. We can fit any colour or style of strap we keep most thin...
