| USD \$642 | EUR 556

Item Reference: SA1210144

Date of manufacture: 1920

Description

Oak Shelving Unit Circa 1920 £475 Solid Oak shelving unit that completely knocks down into component form. This piece has seven shelves that are tusk tenoned into the sides, with two oak pegs per shelf. Lovely storage for books – you'd get loads on this and, being solid, they won't sag like your modern chipboard or MDF based unit! The top has a decorative top rail in lovely quartered oak, whilst there's a similar piece; albeit less decorative at the bottom, both adding rigidity for a free-standing unit. You could fix it to the wall too if you wanted – making it super-strong! Lovely golden oak colour that's been cleaned, polished and waxed. Dimensions: Height: 1715mm Width: 950mm Depth: 280mm Shelf Depth 220mm Please contact us to discuss this beautiful piece, a delivery quote, or to visit and collect. We are furniture restorers and cabinet makers too and happy to discuss restoring your pieces – you can email us at jon@jonhillfurniture.com
