Date of manufacture: 1900

Dimensions

Height = 25 cm (9.8")

Width = 37 cm (14.6")

Depth = 23 cm (9.1")

Description

A fine quality early 20th century brass cased barograph by Short & Mason of London, housed within its original glazed display case and raised on a stepped ebonised plinth base. The instrument features a polished brass mechanism with a traditional stack of vacuum capsules operating a finely balanced recording arm, tracing atmospheric pressure changes onto the rotating chart drum. The drum retains its removable brass top and period chart paper, while the mechanism is engraved "Short & Mason London" together with serial numbering to the brass platform. The instrument is protected by a substantial bevelled glass case with brass framing, allowing full visibility of the beautifully engineered movement from all sides. Originally used for recording and monitoring barometric pressure, this is both a functional scientific instrument and an exceptionally decorative desk or library piece. Dimensions Height: 10 inches – 25cm Width: 14.5 inches – 37cm Depth: 9 inches – 23cm
