Description

An attractive electric skeleton clock with a removable glass dome, showcasing a fully exposed brass movement. The white enamel chapter ring reveals the visible escapement, complemented by finely shaped steel hands. The pendulum operates via a solenoid coil that swings over a bar magnet positioned between its poles, creating a fascinating mechanical display in motion. Raised on a circular, polished wooden base, the clock combines traditional styling with early electric innovation. Serviced and guaranteed for 3 years. Height: 15 3/4" or 40 cm CIRCA. 1925 Provenance: Private collection, UK Would you like to view this clock in your own home? Contact us to arrange a viewing with our Homeview service. (T&C's apply.)
