Item Reference: SA1216608

Date of manufacture: 1910

Description

The watch has an 8 day stem-winding movement, identified as by Omega, which is working nicely... the watch kept time to within two minutes over a 7 day period. The movement is protected by an inner hinged cover. The watch measures 69mm diameter excluding the winding stem and the loop. The case is nickel and it is in lovely condition. The thick glass lens is in good condition, just a couple of small marks but not too serious at all. The dial is in lovely condition with original pin set blued steel hands, a subsidiary seconds dial and outer minute track. The watch comes with a single chain 30cm long including the T-bar and the clasp. The watch and chain come in a new presentation box.
