Description

1930s Swiss open faced pocket watch and chain. The watch has a good quality Swiss 15-jewel stem-winding movement which is working nicely. The movement is protected by an inner hinged cover which has some scratching. The watch measures 50mm diameter excluding the winding stem and the loop. The case is gold plated and it is in good condition, just fairly light surface marking and gentle unevenness to the back. The thick glass lens has three small nibbles to the bevelled edge, and a 3mm scratch. The dial is in good condition. Also included is a gold plated double chain with each length of chain being approximately 24cm long including the T-bar and the clasp (one replacement). The watch and chain come in a new presentation box.
