Description

A vintage (possibly antique) silver panel bracelet set with beautiful faceted rock crystals, in pretty rope twist settings. The gems cast the light very nicely and have been tested and verified as rock crystal quartz. **SIZE:** Just over 17cm (six and three quarter inches) long, the crystals graduate in size from approximately 1 x 1.2cm to 1.1 x 1.5cm. **WEIGHT:** 11.3g. **MATERIALS:** 925 sterling silver, rock crystal. **HALLMARKS/STAMPS:** There are no obvious marks or stamps but the silver tests as sterling. **CONDITION:** In very good vintage/antique condition; the two links attaching the clasp appear to be replacements, although there's no reason to think the clasp itself isn't original, and it has the same faint traces of gilding as the rest of the bracelet. **ERA:** Unknown, although definitely of some age, possibly early 20th century.
