Description

Young Bronze Stag, circa 1925. A finely cast bronze sculpture depicting a young stag standing in an alert, confident pose upon an oval integral base. The animal is rendered with impressive anatomical detail, the sculptor skillfully capturing the strength of the neck, shoulders, and hindquarters while maintaining a graceful, natural stance. The branching antlers frame the head attractively and contribute to the sculpture's commanding presence. The bronze has been professionally waxed and polished, enhancing the rich dark patina and accentuating the surface modeling, muscle definition, and textural detail throughout. The combination of elegant form and refined finish gives the piece considerable decorative appeal. Dimensions: Height 150 cm × Width 100 cm × Depth 50 cm. A striking large-scale bronze suitable for both interior and exterior display.
