Description

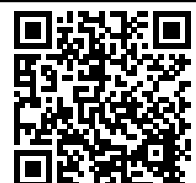

A Lenzkirch Precision Floor Standing Regulator, Longcase Clock, circa 1901. The Lenzkirch factories made the best of the German factory-produced clocks. This piece, being a precision regulator, is an excellent example of the finest mechanism made by this prestigious maker. The high quality walnut case with moulded caddy top in fine original condition with excellent colour and patination. The case is glazed to the front with two opening doors, gaining access to the pendulum and dial area independently, the sides of the case have two further bevel edged latched glazed inspection doors to access the movement. The main door with the original lock brass escutcheon and key. The upper dial / movement winding door has the original lock and key, with brass escutcheon. The base with panelled and moulded centre, surmounted on four turned feet. The interior of the case is finely polished walnut with the original silvered beat scale. The polished movement bracket with blued steel screws is mounted to the backboard of the case and the substantial pendulum hangs from this. The heavy gauge silvered and engraved brass dial is 11" in diameter with unusual 24 hour regulator observatory dia...
