Price

GBP 4,550

| USD \$6,145 | EUR 5,324

Item Reference: SA1218325

Date of manufacture: 19th Century

Description

An impressive and highly decorative 19th century French anatomical model mounted on its original stand. This fascinating educational piece was originally used for medical study and teaching, featuring detailed anatomical construction and excellent period character throughout. A striking display item for collectors of medical antiques, scientific instruments, curiosities, or cabinet of curiosity interiors. The model presents beautifully and would make a distinctive statement piece in a home, office, gallery, or collection. The model retains its authentic aged patina, wear, and character consistent with age and historical use, adding to its originality and appeal. Dimensions * Height: 137 cm Please study the photographs carefully as they form an important part of the description and condition report. A rare and desirable 19th century French medical antique with excellent display presence.
