Chronometer 1969

Price

GBP 2,650

| USD \$3,586 | EUR 3,101

Item Reference: SA1219799

Date of manufacture: 1960

Description

It's the little details that make an IWC so special. This is a near mint original condition example of a top line gent's 9ct gold automatic wristwatch made by the world renowned premier maker International Watch Company or IWC. It has the legendary IWC in-house calibre 8541B fully automatic Chronometer grade movement with hack seconds regarded as one of the finest automatics ever made and known as the "watchmakers watch" as you can see it is in superb condition. The dial is totally original, it has never been restored. The attention to detail is what makes these IWC watches stand out from other manufacturers. The movement has Pelaton automatic winding the most efficient winding system but very expensive to make. The seconds hand is domed along its whole length meaning that from any angle the light reflects along its centre line, these are very difficult to make, everyone else just used standard flat topped seconds hands. It has hacking seconds which means the second hand stops dead when the crown is pulled out so that the watch can be synchronised for exact time. The movement incorporates a rapid date set facility allowing you to set the date in a few seconds. ...
