Description

Antique silver Omega fob watch and chain. The watch has an Omega stem-winding movement which is working nicely. The movement is protected by an inner hinged cover. The watch measures 34.5mm diameter excluding the winding stem and the loop. The case is 935 silver, so slightly purer than sterling silver, and it is in lovely condition, just a very slight indentation to the back, nothing serious at all. The inner back cover has the Omega logo, and both back covers have Continental silver marks. The acrylic lens is in lovely condition. The dial has two faint hairlines. Also included is a single silver chain, 34cm long including the T-bar and the clasp. The watch and chain come in a new presentation box.
