Description

1940s GSTP Fontainemelon British military pocket watch. The watch has a Swiss stem-winding movement, calibre FEF 40N (Fontainemelon) with 15-jewels, 3 adjustments, which is working nicely. The watch measures 52mm diameter excluding the winding stem and the loop. The case is nickel plated and it is in good condition. If viewed very closely, there is a little rubbing to the plate. The back of the watch has the General Service Time Piece initials, together with the crow's foot mark, or pheon, indicating that it was issued to British military ground forces and personnel during WWII. The acrylic lens is in good condition. The dial is in beautiful condition with original hands (original radium paint has been removed). The watch comes with a single leather albert. The watch and albert come in a new presentation box.
