## Description

DRAWING NO. 67090 – ANNOTATED “ENGINE NO. 9310” – DATED 12 JUNE 1905 A remarkable original locomotive works drawing produced during the golden age of British locomotive manufacture, executed entirely by hand for the celebrated Manchester engineering firm Beyer, Peacock & Co. Ltd. Dated 12th June 1905, this substantial drawing relates to a broad gauge steam locomotive constructed for the Bombay, Baroda & Central India Railway (BB&CI), one of the principal railway systems of British India. Unlike the later blueprint or photographic reproductions commonly associated with twentieth-century engineering drawings, this sheet is an original hand-executed working drawing. Examination under magnification confirms that the construction lines, lettering, dimensions, sectioning and coloured areas have all been individually drawn by hand. Minute variations in line weight, natural graphite smudging, occasional overshoots and subtle irregularities throughout the drawing are entirely consistent with traditional draughtsmanship and clearly distinguish the sheet from any form of mechanical reproduction. The drawing is prominently marked “SHOP COPY” and “DRAWER L”, demonstrating that it ...
