| USD \$5,346 | EUR 4,622

Item Reference: SA1228063

Date of manufacture: Regency

Dimensions

Height = 80 cm (31.5")

Width = 195 cm (76.8")

Depth = 62 cm (24.4")

Description

No:11252 A very stylish Regency Period Brass Inlaid Simulated Rosewood scroll arm and back Chaise Longue, the upholstery, bolsters and buttoned seat cushion in a pale green velvet, on sabred feet and castors. The brass cups and casters are stamped "B S & C P Patent" with a crown over. This may well be a Birmingham Brass Foundry "B S" who were making Cope's patented Casters under licence, hence the "C P Patent". The crown above indicates that this was an accepted and issued Patent. The patina on this example is excellent with only a few areas of rubbing on the simulation. A comparable example is stamped by Wilkinson of Ludgate Hill Circa 1815 Price :£3,950- Height: 31½", (80cm), Width: 76¾", (195 cm), Depth: 24½", (62cm). Notes: During the Regency Period, Rosewood was often the choice for fashionable furniture and demand meant that it became very expensive as an exotic, imported timber. It is also a very dense, heavy wood and seldom used in the solid as pieces would have been extremely difficult to deliver and move. The top London makers therefore resorted to making chairs, stools & tables.
