Description

A wonderfully designed Art Deco golden oak sideboard cabinet by English maker Gomme. A particularly pleasing on the eye piece with some fine art deco features; the wonderful overall curved shape, the shapely walnut handles, the curved doors, deep open jointed plinth with walnut inlay and the flight of 4 drawers inside make this so attractive - alongside the scale which is sensible. Condition is good - the piece sits firm and strong, the 4 oak lined drawers are running smoothly - the top one with sections, the grain and tone of the oak is top grade, both doors are opening and closing as they should with good storage inside. We have a few nicks to the walnut on the handles, old not fresh and the odd mark or two to the oak fronts and sides. We have carefully cleaned the piece to highlight its features and timber and it is ready for placing. A rather good looking Art Deco sideboard by Gomme c1930.
