Description

Antique silver Tavannes pocket watch, c1900. The watch has a good quality stem-winding movement which is working nicely. The movement is signed with the Tavannes name, and it also has a brevet (patent) number 12091 which relates to an 1896 patent for a pendant-set mechanism. The movement is protected by an inner hinged cover. The watch measures 50mm diameter excluding the winding stem and the loop. The case is 935 silver and there are Continental hallmarks inside both of the case backs. The front of the case is in good condition. The hinged case back has some unevenness. The glass lens is in lovely condition. The signed dial has a very faint hairline running from the centre up to number 12, quite difficult to see with the naked eye. The watch comes in a new presentation box.
