## Description

This is a superb example of a Victorian oak cased traditional weight driven Vienna regulator clock. The oak case has a wonderful mellow colour and patina and the grain really does shine through. The white enamel dial is in perfect condition with no chips or cracks, it also has a white enamel beat plaque. The weight driven movement has just been professionally serviced and is in perfect running condition so you can be assured that this clock will give trouble free service for many years to come. It runs for a full 8 days and strikes on the hours and half hours and is keeping accurate time to within 10 seconds a day. This is a top quality movement with a deadbeat escapement and maintaining power, features you will only find in the very best regulators. The clock comes with its original dial, pendulum and glass. Overall this is an outstanding clock in superb condition and was obviously made by a premier German clockmaker although I am unable to identify the trademark on the back of the movement. The clock movement comes with a full 12 month warranty. Dimensions of clock: Height 47 ", width 16 " and depth 7.5 ", the diameter of the dial is 8 " Delivery for this ...
