

SA194496

High Quality Tube Chime Grandfather Clock

Price

Sold**Item Reference: SA194496****Date of manufacture: 1900**

Description

A high quality late Victorian Grandfather Clock with Regulator and Quarter Striking movement. The impressive and substantial 8 day duration Regulator movement with large thick plates, deadbeat escapement, superb quality maintaining power and with beat adjustment screws to the back cock. The movement also features a large pin barrel to the rear which enables the clock to strike on the quarters. A tune selection dial is situated in the arch of the dial which depicts Whittington, St Michael and Westminster. The quarters are struck on eight chrome plated tubes hanging from cast iron brackets to the rear of the case. The hour is struck on a larger chrome plated tube positioned next to the movement. The pendulum is also of a large construction with a silvered brass regulation nut. The dial has a separate silvered brass chapter ring with applied brass Arabic numerals, seconds and two subsidiary dials to the arch controlling the chime silent of the quarters and tune selection. At IX there is also a Strike/Silent lever for the main hour chime. The dial is elaborately decorated with applied brass fretwork which is engraved to a very high standard. The retailers name of W. C. Mann,...
