Description

Circa late 19thC - early 20thC, this is an unusual gilded brass wall light in a foliate design, beautifully made. We have lightened the photographs so the details can be seen easily, in reality it is slightly darker. It has three lights in the shape of flowers, and is surrounded by brass leaves and branches. The light has recently been rewired for the UK market, and it takes small bayonet cap pygmy bulbs which would give the best effect. The light measures approximately 44cm in length at the longest part, and 36cm across. The price includes postage and package within the UK.
