Unusual Antique English Sterling Silver Serving Set - Coins In Bases - 1894

Price

Sold**Item Reference: SA231044****Date of manufacture: 1890**

Description

A fabulous and unusual Victorian sterling silver serving set in its original presentation case. The set consists of a sugar bowl, creamer and sugar sifter, all three pieces inset with an old English coin, I believe two being Charles II coins dating to 1678 and the third with a George IV Shilling dating to 1826; I presume this set was made especially for a client with three of their collectible coins. All three pieces having gilded interiors and each is hallmarked for Birmingham 1896 together with the makers initials for the silversmith, Stokes & Ireland Ltd -William Henry Stokes & Arthur George Ireland. The box is in very good condition with some wear to covering on the underside and once opens reveals a fabulous silk and velvet lined interior with the Irish retailer's label printed: John Jameson & Sons, Watchmakers, Jewellers and Silversmiths. 87 Grafton Street, Dublin. Excellent condition, the three pieces weigh a combined 5.11 Troy Ounces or 158.8 Grams. The sugar has a rim diameter measuring 3 1/2" and stands 2 1/2" tall; the creamer measures 3 5/8" from spout to handle and stands 2" tall; the sugar sifter measures 5" in length.
