

SA267199

Antique William IV Rosewood X Framed Stool

Price

Sold**Item Reference: SA267199****Date of manufacture: 1800**

Description

This is a period William IV rosewood X framed stool in good original condition dating from the 1830-40's period. It has those typical incised cut outs & shaping around the top, which were only done in that period. The shaped X framed legs have a turned cross stretcher joining them, which gives extra stability. The seat has been recovered in a cream linen fabric by my upholsterer & you can feel the crisp horse hair inside when you press down. If you wanted to recover, it's held in by two screws underneath. It would be a very easy job for any upholsterer & shouldn't cost more than £15 - £20 to do. Length - 20.5", 52 cm Depth - 17.5", 45 cm Height at the middle point - 17", 43 cm
