Description

A rare find indeed, this unusual clock is made by Kieninger of Germany, a company renowned for the quality of their products. The 8 day, twin-weight movement strikes on the half-hour and the hour. It has a gridiron pendulum and heavy brass weights. The white enamelled dial is free from any chips, cracks or crazing. It has black Roman numerals and nicely cut hands. The full length opening door is of moulded celluloid with a totally authentic timber like appearance and represents the true Black Forest style with a large eagle to the base. An original carved clock of this style would be worth countless thousands of pounds. A rare chance to acquire a magnificent clock for very little money.
