Description

VERY RARE 17th century turned lignum mortar and pestle. Great early shape pestle which is 6 1/2" diameter by 6" high. The pestle is also a very nice turned shape. This example from the collection has been well used over the years but it is so rare to find 17th century examples in any condition especially with the pestle. The mortar does have an old filled crack to one side and the overall look is well worn but it is a nice colour. One of four early mortars all recently purchased from a private collection.
