Description

A quite wonderful and charming tiny photograph frame made from English brass picture frame, the angle can be altered as it pivots just like a mirror on a stand. The base is weighted to give a good solid and steady, the foot with a cast foliate design and leading up to highly decorative brass wire supports. Dating to the late Victorian era, around 1890, it remains in superb condition. The base has a diameter measuring 1 5/8" and stands 3 3/4"; the glazed aperture of the frame measuring just 1 1/4" x 1".
