Gents Omega 30T2 wrist
watch, c1944

Price

Sold

Item Reference: SA330202

Date of manufacture: 1940

Description

A gents 1940s Omega wrist watch. The watch has a hand-winding movement, 30T2, which is ticking away nicely and the time keeping is good to within around two to three minutes over 24 hours. The movement is signed Omega and it has the serial number 10,046,576 which dates it back to around 1944. The watch measures 33mm diameter excluding the winding crown and the lugs. The case was made by the English watch case maker Aaron Dennison. The bezel and snap-on case back are stainless steel; the central part of the case is nickel which would have originally been plated but this has worn off over the years, which is quite usual considering its age. The case back has light surface scratches and there is marking to the finish on the winding crown. The lens has minor marks but is very acceptable. The dial has been professionally re-finished and looks very good. A new black leather strap has been fitted. PRICE INCLUDES WORLDWIDE POSTAGE
