Description

An exceptionally rare 18th century longcase clock featuring quarter striking and moonphase to the arch. The large 5 pillar 8 day duration movement has an anchor escapement, it strikes the hours on the main bell and the quarters on a further eight bells. The brass dial has a separate silvered brass chapter ring enclosing a matted centre with seconds, blued steel hands of typical London design, 3 winding holes and the makers name and place of work. All surrounded with brass spandrels to the corners. The arch with scroll, foliage and flower engraving, a painted moonphase dial with a blue background and gold stars. Also with finely engraved silvered brass hemispheres showing nautical scene. The spectacular mahogany case has a long trunk door and is flanked by reeded and brass inlaid quarter pillars. The base has raised shaped panel and typical double shaped plinth. Both the trunk door and base panel have superb flame veneers of the highest quality. The hood with separate brass capped and brass inlaid angle pillars below a pagoda top with a shaped sound fret and surmounted with three brass finials and a centre cresting. Note: John Barber is listed as working in Stratf...
