Dimensions

Height = 30 cm (11.8")

Width = 25 cm (9.8")

Depth = 5 cm (2.0")

Description

We discovered this wonderful Art Deco mount bereft of a centre stone. After much deliberation, we plumped for gemstone we adore but – as antique dealers – almost never see: tsavorite, first discovered in the late 1960s. The stone is rubover set in within a phenomenally intricate and beautifully detailed vented gallery. Fifteen eight-cut and rose cut diamonds surround the stone, with a further six (three either side) in the shoulders. The best of two ages, in one ring. Accompanied by an independent jewellery report. Cut – Oval shaped mixed cut tsavorite and old eight-cut and rose cut diamonds. Colour – The diamonds are G to I. Clarity – The tsavorite is SI. The diamonds range from SI1 to I1; all are clean to the naked eye. Carat – The tsavorite is a known 3.25 carat. The total approximate diamond weight is 0.48 carat. Circa – The mount is circa 1925. Size – Q (UK) or 8 (US). Complimentary sizing is available, can be sized up or down. Measurements – The tsavorite is approximately 10.5mm by 8.75mm and sits 5.4mm from the finger. Metal – Platinum. Stamped 10% iridium 90% platinum. Video – To view a video of this ring in daylight, please copy / paste the following li...
