Description

An antique Waltham half hunter pocket watch. The watch has a stem-winding movement, grade 625, which is working nicely. The movement is signed and it has the serial number 16758781 which dates it back to 1908. A particularly nice feature is the micrometer regulator. The movement is protected by an inner hinged cover. The watch measures 50mm diameter excluding the winding stem and the loop. The gold filled case was made by the Illinois Watch Case Company and it is in good condition with just general light surface marks from use over the years. The small plastic lens to the front is in good condition. The winding crown pushes in to release the front cover. There is a plastic lens which is in good condition. The white enamel dial is signed with the Waltham name. PRICE INCLUDES WORLDWIDE POSTAGE
