Antique Elgin hunter pocket watch, super movement

Price

Sold**Item Reference: SA399822****Date of manufacture:**

Description

An antique Elgin full hunter pocket watch with high grade movement. The watch has a very nice quality stem-winding movement, grade 242, which is working well. This grade of movement is fairly rare in that only 7000 were ever made. The movement has a Moseley patent regulator... any movement with a patent regulator is regarded as being of superior quality. The signed movement has the serial number 10375409 which dates it back to around 1904. It is protected by an inner hinged cover. The watch measures 50mm diameter excluding the winding stem and the loop. The case is gold plated and was made by the English based watch case maker Aaron Dennison. The case is in good condition, just a minor outward indentation to the case back. The winding crown pushes in to open the front cover. The plastic lens is in good condition. The signed white enamel dial is in lovely condition and has the added feature of an outer minute track with red numbers. Blued steel hands. PRICE INCLUDES WORLDWIDE POSTAGE
